RECRUIT

ASmartPlace.com, the official website of ASmartPlace, serves as the hub for the Chamber's Economic Development and Talent Recruitment activities. For job seekers and newcomers to our region, it shows what it is like to live, work, play, and grow in the Huntsville region. This site is the focal point of the Chamber's marketing campaign designed to reach qualified regional and national candidates. Sponsorship opportunities are available for more exposure, and we promote on all of our social media platforms. Newly updated in March 2022, these resources are structured to support your recruitment teams with information about the region that can be easily shared with potential candidates and new talent.

Hiring Our Heroes (HOH) is a partnership program between the Chamber and the U.S. Chamber of Commerce Foundation, with a full-time program manager in Huntsville. HOH is a nationwide initiative to help veterans, service members, and military spouses find meaningful careers. As one of 18 communities with a local program manager, we are able to increase awareness and opportunities for our local companies and raise our community profile among service men and women. In addition, the Chamber is actively engaged in HOH hiring events and programs in-person and virtually to connect transitioning service men and women with the career opportunities in our community.

ASmartPlace on the Road takes our community recruitment message to targeted colleges and universities across the nation. This is a great opportunity to showcase your company and job openings to students seeking internships, co-ops, and full-time employment.

Senior Sprint is a collaborative program with Huntsville City Schools, Madison City Schools, Madison County Schools, community agencies, and local employers to provide career opportunities for graduating high school seniors who have not enrolled in a post-secondary college or university or made firm post-graduation plans. Senior Sprint creates a bridge from high school to the workforce by providing graduates with several career and training opportunities while raising awareness about employment opportunities which will guide them toward long-term post-graduation careers.

ReLaunch Career Fair provides opportunities for individuals who are unemployed, underemployed, have dropped out of high school, are not achieving their full potential, or are in need of a relaunch of their career, to connect with local employers and opportunities. The mission of this initiative is to assist our local companies in finding capable workers and to empower members of our community by improving their quality of life and financial stability. The Chamber hosts this event in collaboration with the Alabama Career Center, the Alabama Community College System, nonprofits, and community agencies to help bridge the gap between the under resourced job seeker and our employers.

RETAIN

Go Rocket City! is a video series to help talent learn more about Huntsville, from our food and festival scene, to the great outdoors. This is an engagement and retention initiative to spotlight some of Huntsville's favorite local arts, entertainment, dining, and recreation options.

Link Up! is a ASmartPlace Newcomer event. The goal is to showcase a variety of organizations to those that have recently relocated and are looking for ways to get plugged in to our community, whether that is through social events, professional development opportunities, or volunteering.

ASmartPlace Intern Mixer is a summer event focused on engaging and retaining our summer interns and co-op students in the Rocket City. The main goal of the event is to allow students to connect with one another while learning more about our community and the career opportunities available to them.

Wage & Benefits Survey is conducted each spring. The survey enables local employers to gauge their compensation and benefit data against other companies in our region. The survey data is valuable to companies to use as a pricing tool for bidding contracts, and, most importantly, as a human resources guide for benchmarking wage and benefit rates.

TRAIN

State of the Schools is an annual event that focuses on the mission, vision, data and strategic goals for the future of public education across Huntsville City Schools, Madison City Schools and Madison County Schools. In partnership with The Schools Foundation, this event features the superintendents of each district along with student and teacher voices to highlight the Pre-K-12 education programs that are preparing students for long-term success in our region. This is an excellent opportunity for the business community to hear directly from educators about programs, policy, and performance in our local systems, which is relevant to our workforce of today and the future.

Industry Insights allow 200+ teachers, career coaches, and educators from across Huntsville City, Madison City and Madison County public schools to step outside the classroom and participate in on-site tours of industry locations. We focus on smart careers in target industries, ranging from advanced manufacturing and construction to cyber, supply chain, healthcare, and more. Educators are taken on tours of a business, factory floor, production plant, or construction site to witness first-hand how an industry looks, works, and feels while also hearing directly from hiring managers about that industry's workforce needs and ways for students to pursue applicable career paths or ready-to-work initiatives.

Smart Careers in ASmartPlace is an initiative that connects students, teachers and parents with information about high-growth, high-demand occupations in our community and the pathways to reach them. We work across our K-12 school districts and our post-secondary institutions and with our business and industry to align resources and identify challenges and opportunities.

Federation for Advanced Manufacturing Education (FAME)

The Chamber actively partners with and has representation on the Board for the Rocket City FAME (Federation for Advanced Manufacturing Education) Advanced Manufacturing Technician (AMT) Program. This program includes a two-year technical Associate degree that combines cutting-edge curriculum that supports advanced manufacturing technology through paid working experience, along with learning highly sought after business principles and best practices of a world class manufacturer. Students are sponsored by local companies as part-time employees throughout the five semester program. Students work three days per week at the sponsoring company and attend school two days per week.
