

YOUR MEMBER WEBPAGE TIPS & TRICKS

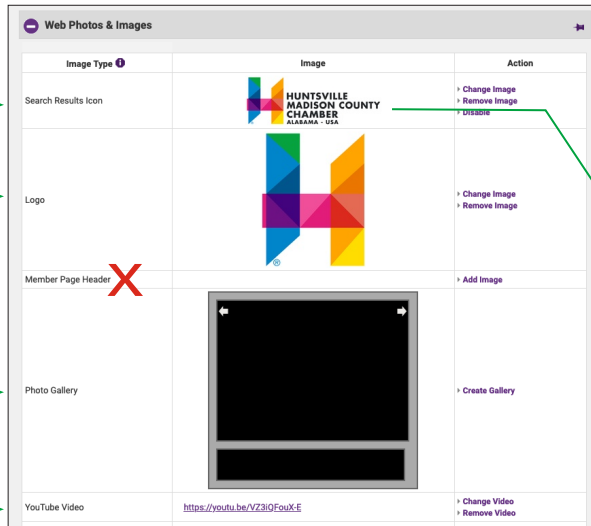

Adding Your Company Logo

It is best to put the full company logo in the "Search Results Icon" place. Click **Enable** on the right if needed. This will show on the Member Directory Listing on our website as shown below.

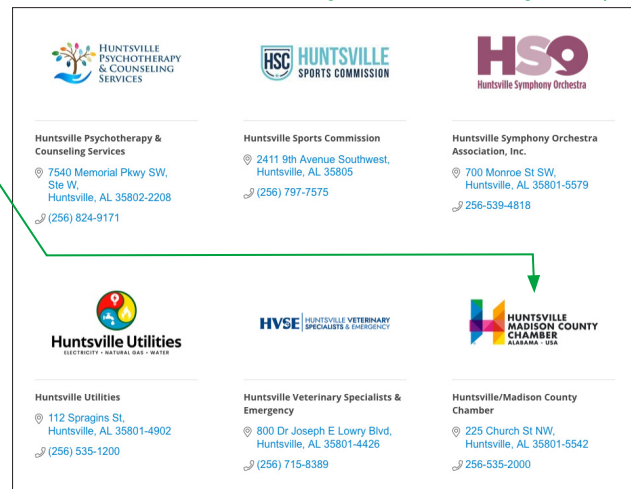

The full logo or an icon if available works best as the "Logo". This will show on the Member's page on our site as shown in bottom sample.

Please do not use the Member Page Header option.

Preferred format for logo: jpeg (some png files will work also)

Using the Chamber's CM listing as a sample:

Adding Other Visuals

Recommended:

- Add good quality images to the Photo Gallery if available – do not repeat your logo here.
- If your company has a YouTube video that is current and applicable, add the URL link to the YouTube Video option.

Addresses & Maps

If you want your physical address shown as well as a map, make sure the address is put in correctly.

If the map is not correct, click "Search Results Map Information" at the very bottom, click Look up next to Manually set coordinates, then check the box next to it. If the map is still wrong, ask for help.

If you do not want your address shown, make sure not to include on web tab.
